PROFESSIONAL SUMMARY

Senior Full Stack Developer with 9+ years of experience designing, developing, and scaling enterprise web applications using PHP, Laravel, React.js, Node.js, and MySQL. Experienced in architecting RESTful APIs, multi-tenant SaaS platforms, notification systems, CRM solutions, and healthcare applications serving thousands of users. Hands-on background in Python scripting, application performance optimization, Docker-based deployments, cloud infrastructure (AWS), and AI-assisted development. Familiar with PostgreSQL and Apache server configurations, actively expanding expertise in Azure Cloud and Python backend development. Proven ability to deliver production-grade systems independently, mentor junior developers, and collaborate with cross-functional teams in Agile/Scrum environments. Quick to acquire new technologies and apply them effectively in real-world projects.

TECHNICAL SKILLS

Languages: PHP, JavaScript (ES6+), Python, SQL, HTML5, CSS3, VB.NET, C#

Frameworks: Laravel, React.js, Node.js, Express.js, Core PHP, jQuery, AJAX

Databases: MySQL, PostgreSQL (familiar), MongoDB, Redis

Cloud & DevOps: AWS (EC2, S3, IAM, RDS), Azure Cloud (familiar), Docker, Docker Compose, Nginx, Ubuntu, GitHub Actions

API & Integrations: RESTful APIs, JWT Authentication, OAuth, Facebook Leads API, Google SDK, WATI (WhatsApp), Firebase FCM, AWS SDK

Architecture: SaaS / Multi-Tenant Architecture, RBAC, Queue-Based Processing, WebSockets, SOLID Principles

Testing & Tools: Unit Testing, Manual Testing, Laravel Horizon, Tortoise SVN, Git, Postman, Jira, VS Code, Slack, Trello, Figma

Payment Gateways: RazorPay, ICICI Eazypay

AI Engineering: GitHub Copilot, ChatGPT, Gemini, Prompt Engineering, AI-assisted Debugging, Automated Documentation

Methodology: Agile / Scrum, Sprint Planning, Code Reviews, Team Mentoring

SYSTEM DESIGN & ARCHITECTURE

- Multi-Tenant SaaS Applications
- Role-Based Access Control (RBAC)
- RESTful API Architecture
- Queue-Based Processing (Laravel Horizon, Redis)
- Notification Systems (SMTP, WhatsApp, FCM, SMS)
- Scalable Reporting Systems
- Database Design & Optimization
- Third-Party API Integrations
- Cloud-Based Deployment Architecture

PROFESSIONAL EXPERIENCE

Toro Health Private Limited, Coimbatore - Senior Full Stack Developer

Apr 2022 - Present

- Architected multi-channel notification systems integrating SMTP, WhatsApp (WATI), and Firebase Cloud Messaging (FCM), delivering 100,000+ notifications monthly to patients and healthcare staff in real time.
- Developed PDF and Excel reporting modules processing 10,000+ records per report with optimized query execution, reducing report generation time by 50%.
- Designed and optimized 50+ REST APIs handling high-volume healthcare transactions and asynchronous task workflows, reducing average API response time by 40%.

- Led healthcare platform scaling and live migration in an Agile/Scrum environment, maintaining 99%+ uptime under high-traffic conditions.
- Implemented queue-based processing using Laravel Horizon and Redis to handle background jobs for document generation and notification dispatch, reducing server load by 35%.
- Designed multi-role access control (RBAC) systems ensuring data security and compliance across patient, doctor, and admin workflows.
- Collaborated with QA, product owners, and stakeholders on sprint planning, technical estimations, and iterative feature delivery.

Bright Bridge Infotech, Coimbatore - Senior Web Developer

Mar 2021 - Mar 2022

- Developed and deployed 15+ production web applications using Laravel and React.js, improving client operational efficiency and significantly reducing manual workflows.
- Designed REST APIs for third-party integrations across web, Android, and iOS platforms, including Facebook Leads API, Google SDK, and WhatsApp notification systems.
- Introduced Dockerized development and deployment workflows, reducing environment setup time by 70% and improving deployment consistency across teams.
- Implemented JWT authentication and OAuth flows for secure user onboarding across web and mobile platforms.
- Performed debugging, unit testing, and performance tuning for production systems; enforced coding standards and SOLID principles through peer code reviews.

Inexpensivencoders, Coimbatore - Software Developer

Jan 2017 - Feb 2021

- Developed desktop applications using VB.NET and C# for retail and healthcare domains including pharmacy management systems with inventory and sales tracking.
- Delivered end-to-end custom web solutions for small businesses, handling development, deployment, and post-launch troubleshooting independently.
- Built early-stage Python scripts and automation utilities for data processing tasks, establishing foundational Python experience.

LEADERSHIP & COLLABORATION

- Mentored junior developers on Laravel and React.js best practices, improving team code quality and delivery speed.
- Conducted code reviews and enforced SOLID principles and coding standards across the engineering team.
- Collaborated closely with QA, Product Owners, and stakeholders to align technical delivery with business goals.
- Participated actively in sprint planning, backlog grooming, and technical estimations in Agile/Scrum teams.

KEY PROJECTS

Enterprise Healthcare Management (SaaS) Platform

Tech Stack: *Laravel, React.js, MySQL, REST APIs, WhatsApp API, Firebase FCM, SMS Gateway, Docker, Redis*

- Large-scale healthcare management platform serving multiple user roles across web and mobile applications; led backend architecture, REST API development, database design, third-party integrations, and system optimization end-to-end.
- Developed secure, optimized REST APIs for web and mobile applications; designed scalable RBAC architecture supporting multiple user types and permission levels.
- Built workflow modules for attendance, leave management, inventory, and operational tracking; developed automated notification systems via FCM, WhatsApp, SMS, and Email.
- Implemented Firebase Dynamic Links for deep-linking and mobile user engagement.
- Built high-performance Excel/CSV import-export and PDF report generation systems; designed asynchronous processing workflows for notifications and reporting tasks.
- Optimized database queries and API performance for high-volume transactions.

Healthcare Referral Management Platform

Tech Stack: *Laravel, React.js, MySQL, REST APIs, Webhooks, WhatsApp API (WATI), SMS Gateway, Firebase Cloud Messaging, Docker, Redis*

- Designed and developed a scalable, multi-role healthcare referral system with RBAC for patients, doctors, and admins.

- Reduced referral processing time by 60% through automated workflows, chatbot-driven updates, and real-time WhatsApp notifications.
- Built webhook-driven WhatsApp bot rendering dynamic forms inside the chat flow and syncing submissions via REST API.
- Built responsive React.js frontend integrated with Laravel REST APIs; implemented secure data flow and audit logging for compliance.
- Delivered automated PDF and Excel report generation processing 10,000+ records with query-level optimizations.
- Integrated multi-channel notifications via WhatsApp, SMS, email, and FCM push alerts for real-time patient and provider communication.

Lead Management & CRM Campaign Tracking System

Tech Stack: *Laravel, React.js, Facebook API, Google SDK, MySQL*

- Built a CRM module integrating Google and Facebook Leads API for real-time campaign lead capture, reducing manual data entry by 80%.
- Implemented social login (Google, Facebook) and automated lead assignment workflows with status tracking for sales teams.

Healthcare Video Consultation Platform

Tech Stack: *PHP, JavaScript, MySQL, REST APIs, RazorPay, ICICI Eazypay*

- Built a full-featured platform for booking and attending video consultations with integrated payment gateway (RazorPay, ICICI Eazypay) and data privacy compliance.
- Designed RESTful APIs for scheduling, payments, and notifications, supporting seamless cross-device user experience.

DEVOPS & INFRASTRUCTURE

- Docker & Docker Compose - containerized development and deployment environments
- Nginx & Apache - web server configuration and reverse proxy setup
- Ubuntu Server - Linux-based production server administration
- GitHub Actions (CI/CD) - automated build, test, and deployment pipelines
- AWS EC2, S3, RDS, IAM - cloud infrastructure provisioning and management
- Azure Cloud (familiar - actively learning)
- Environment Containerization - consistent local and production environments
- Deployment Pipelines & Automation - streamlined release workflows

AI-AUGMENTED DEVELOPMENT

- GitHub Copilot - accelerated feature development with AI-assisted code completion and refactoring.
- ChatGPT & Gemini - used for prompt engineering, automated documentation, and AI-driven test case generation.
- AI-assisted debugging - reduced bug resolution time by applying AI tools to trace and fix complex issues.
- Certified in AI Fluency Framework & Foundations - Anthropic (2026): applied AI tools to improve development workflows and productivity.

EDUCATION

M.Sc. Computer Science - Sacred Heart College, Tirupattur

2019 - 2021 | Percentage: 81.5%

AWARDS & RECOGNITION

Sacred Heart Young Innovator Award (SHYIA) - 2021: Secured 2nd Prize for Face Emotion Detection project using machine learning and computer vision.
