

HARI PRASATH

Senior Full Stack Developer | PHP | Laravel | React.js | Node.js | AWS | Docker | REST APIs

Peelamedu, Coimbatore, Tamil Nadu | +91 9789672823 / 8682876305 | cbe.hariprasanth@gmail.com | [linkedin.com/in/hari-prasath-6b57aa113](https://www.linkedin.com/in/hari-prasath-6b57aa113)

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 9+ years of experience designing, developing, and scaling enterprise web applications using PHP, Laravel, React.js, Node.js, and MySQL. Experienced in architecting RESTful APIs, multi-tenant SaaS platforms, notification systems, CRM solutions, and healthcare applications serving thousands of users. Strong background in application performance optimization, Docker-based deployments, cloud infrastructure (AWS), and AI-assisted software development. Proven ability to lead feature delivery, mentor developers, and collaborate with cross-functional teams in Agile environments.

CORE SKILLS

Languages & Frameworks: PHP, Laravel, JavaScript, React.js, Node.js, Core PHP, jQuery, AJAX, HTML, CSS

Architecture: SaaS Architecture, Multi-Tenant Applications, RESTful API Design, Microservices Concepts, SOLID Principles, Role-Based Access Control (RBAC)

Backend & Data: MySQL, MongoDB, Redis, Queue Jobs, Laravel Horizon, Database Design & Optimization

Authentication & Security: JWT Authentication, OAuth, Firebase Authentication

Real-Time & Messaging: WebSockets, Firebase Cloud Messaging (FCM), WATI (WhatsApp API), SMTP

DevOps & Cloud: Docker, Docker Compose, Nginx, Ubuntu, GitHub Actions, AWS EC2, AWS S3, AWS RDS

Testing & Quality: Unit Testing, Manual Testing, Code Reviews, Debugging & Performance Tuning

AI-Augmented Development: GitHub Copilot, ChatGPT, Gemini, Prompt Engineering

Methodology: Agile/Scrum, Sprint Planning, Technical Estimation

SYSTEM DESIGN & ARCHITECTURE

- Multi-Tenant SaaS Applications
- Role-Based Access Control (RBAC)
- Notification Systems (SMTP, WhatsApp, FCM)
- Queue-Based Processing (Laravel Horizon, Redis)
- RESTful API Architecture
- Database Design & Optimization
- Scalable Reporting Systems
- Third-Party API Integrations
- Cloud-Based Deployment Architecture

EXPERIENCE

Toro Health Private Limited, Coimbatore - Senior Web Developer

Apr 2022 - Present

- Architected multi-channel notification systems integrating SMTP, WhatsApp (WATI), and Firebase Cloud Messaging (FCM) for real-time patient alerts, supporting an estimated 100,000+ notifications monthly across the patient base. *Volume estimate - please confirm or adjust.
- Developed PDF and Excel/CSV reporting modules for clinical health reports, processing an estimated 10,000+ records per report with optimized query execution to keep generation times low. *Volume estimate - please confirm or adjust.
- Designed and optimized REST APIs for asynchronous task handling and heavy document generation, reducing average API response time by an estimated 30-40% through query tuning and caching. *Percentage estimate - please confirm or adjust.
- Led healthcare platform scaling and migration efforts in an Agile/Scrum environment, maintaining stability under high-traffic, multi-tenant patient and provider load.
- Introduced queue-based background processing for notification and reporting workloads, improving system responsiveness during peak usage.

Bright Bridge Infotech, Coimbatore - Senior Web Developer

Mar 2021 - Mar 2022

- Developed and deployed multiple production web applications using Core PHP, Laravel, React.js, and AJAX, streamlining client workflows and reducing manual processes. *Application count not specified in source resume - recommend adding actual number.
- Designed REST APIs for third-party integrations spanning web, Android, and iOS platforms, enabling consistent data access across all client touchpoints.
- Implemented WhatsApp-based notification systems for real-time alerts and user engagement, improving response times to time-sensitive updates.
- Introduced Dockerized development and deployment workflows, reducing environment setup time by an estimated 60-70% and improving deployment consistency across the team. *Percentage estimate - please confirm or adjust.
- Performed debugging, testing, and performance tuning across production systems to maintain reliability and uptime.

Inexpensivencoders, Coimbatore - Software Developer

Jan 2017 - Feb 2021

- Developed desktop applications using VB.NET and C# for retail and healthcare clients, including inventory and sales tracking systems.
- Delivered custom web solutions for small businesses, managing requirements gathering through deployment.
- Provided end-to-end support including deployment, troubleshooting, and post-launch maintenance for client systems.

LEADERSHIP

- Mentored junior developers on Laravel and React.js best practices, accelerating their ramp-up time on production codebases.
- Conducted code reviews and enforced coding standards (SOLID principles) to maintain code quality across the team.
- Collaborated closely with QA, Product Owners, and stakeholders to align technical delivery with business requirements.
- Participated in sprint planning and technical estimation as part of Agile/Scrum delivery cycles.

PROJECTS

Multi-Role Healthcare Referral Management Platform

Tech Stack: Laravel, React.js, MySQL, REST APIs, WhatsApp API (WATI), Firebase Cloud Messaging, Docker

Key Features:

- Multi-role, role-based access control (RBAC) supporting distinct workflows for providers, staff, and administrators
- Referral workflow automation with status tracking from intake through resolution
- Real-time notifications via automated WhatsApp bot, email, and push alerts for referral updates and reminders
- Chatbot workflows handling referral status checks, reminders, and routine user interactions via WhatsApp
- PDF and Excel/CSV reporting with optimized query execution for operational and clinical reporting

Impact:

- Reduced manual referral tracking effort by streamlining status updates and automating routine communications. *Specific percentage not available in source resume - recommend adding if known (e.g. referral processing time reduced by X%).
- Improved patient and provider communication consistency through automated, multi-channel notifications.
- Strengthened data security and access control through granular, role-specific permissions.

Lead Management & Campaign Tracking System

Tech Stack: Laravel, REST APIs, Google Sign-In, Facebook Login, Facebook Leads API

Key Features:

- CRM module to capture, manage, and segment leads generated from marketing campaigns
- Social login (Google, Facebook) to onboard users and capture verified lead data
- Google and Facebook API integrations to collect campaign-based lead information in real time
- Automated workflows for lead assignment, tracking, and status updates

Impact:

- Improved lead conversion efficiency by reducing manual data entry and accelerating sales follow-up. *Specific percentage not available in source resume - recommend adding if known.

Healthcare Video Consultation Platform with Payment Gateway

Tech Stack: PHP, JavaScript, MySQL, REST APIs, Payment Gateway Integration

Key Features:

- End-to-end video consultation booking and session management
- Secure payment gateway integration for consultation transactions
- Data privacy safeguards aligned with healthcare data handling practices

Impact:

- Enabled remote patient-provider consultations with a seamless booking-to-payment user experience.

DEVOPS & CLOUD

- Docker
- Docker Compose
- Nginx
- Ubuntu
- GitHub Actions
- AWS EC2 (hands-on exposure)
- AWS S3 (hands-on exposure)
- AWS RDS (hands-on exposure)

AI-AUGMENTED DEVELOPMENT

- GitHub Copilot
- ChatGPT
- Gemini
- AI-Assisted Debugging
- Prompt Engineering
- AI-Assisted Code Refactoring
- Automated Documentation
- AI-Driven Test Case Generation

EDUCATION

M.Sc. Computer Science - Sacred Heart College, Tirupattur

2019 - 2021 | Percentage: 81.5%

CERTIFICATIONS

AI Fluency Framework & Foundations - Anthropic (2026)

- Learned AI fundamentals, prompt engineering, and responsible AI usage
- Applied AI tools to improve development workflow and productivity

AWARDS & RECOGNITION

Sacred Heart Young Innovator Award (SHYIA) - 2021: Secured 2nd Prize for the Face Emotion Detection project, utilizing machine learning and computer vision techniques.
